CHAPTER 9: INFRASTRUCTURE FINANCING ANALYSIS

9.1 INTRODUCTION

The Infrastructure Financing Analysis is important to ensure entities can receive funding to meet their water needs. Senate Bill 2 of the 77th Texas Legislature incorporated the Infrastructure Financing Report (IFR) requirement into the regional water planning process. For purposes of the IFR, each regional water planning group (RWPG) is required to determine proposed financing for all the water management strategies (WMS) with capital costs that were proposed in this round of planning. For each of these strategies, the RWPG must determine the funding needed to implement the strategy, and what types of funding are likely to be accessed.

According to TWDB guidelines, the primary objectives of the IFR are to determine:

- the number of entities with identified needs for additional water supplies that will be unable to pay for their water infrastructure needs without outside financial assistance;
- how much of the infrastructure costs in the RWPs cannot be paid for solely through local utility revenue sources;
- the financing options proposed by entities to meet future water infrastructure needs (including the identification of any State funding sources considered); and,
- what role(s) the RWPGs propose for the State in financing the recommended water supply projects.

The Texas Water Development Board (TWDB) will provide the RWPG’s with an IFR survey used to obtain information about each Water User Group (WUG) entity’s plan to finance the WMS recommended for them in the RWP.

The tabulated survey results are presented in Appendix F.
